

DURA DOWEL ACCESS MATS

Our patent pending cross doweled access mats have undergone hours of rigorous testing. Video clips of testing can be viewed on our website at Rigmats.ca

When it comes time for disposal, our metal-free mats give the owner the option of burning or shredding it on site, saving you the shipping and handling costs.

Our Dura Dowel access mats may even be recycled into animal bedding, hog fuel, oilfield down hole, landscape mulch, wood stove fuel, and much more.

BOLTED ACCESS MATS

Access Mats are an affordable, eco-friendly solution for oilfield, agriculture, or wherever you need access in wet or inclement conditions requiring limited ground disturbance.

Applications include temporary roads, staging areas, landing pads, walkways and more.

- ✓ 8' X 14', with three 12" fingers to interlock with ends of adjoining mats
- ✓ Laminated three layers of #2 or better 2" x 8" red douglas fir
- ✓ Solid core centre layer
